

BUSINESS CONTINUITY & DISASTER RECOVERY

WHAT DOES THIS MEAN TO YOUR FINANCIAL FIRM?

BC & DR

It is a common, but deadly mistake to use the term Backup (B/U) interchangeably with Disaster Recovery (DR). A mistake like this can cost your business its data integrity, data availability, and will most definitely affect all modes of communication amongst your employees. Backup is the process of making copies of files to have a historical record of your business's data, whereas Disaster Recovery is a set of procedures, hardware (computers, network, storage) and software (OS and applications) that enable your organization to restore operations in the case of a cyberattack, outage, or natural disaster. Both are equally crucial to have as an efficient business as technology improves and as more and more data is being shared across all departments of your business. Having both enables an effective Business Continuity plan, the assessment of your organization's IT enterprise, as well as systemically identifying and eliminating single-points of failure. Developing an effective Business Continuity plan is not easy, however, a Managed Service Provider such as VPLS will ensure to provide your organization with the following:

- ▼ Backup as a Service (BaaS) allows VPLS to run your backups on our enterprise infrastructure
- ▼ VPLS's Disaster Recovery as a Service (DRaaS) adds the extra layer of actual hardware and software infrastructure to "stand up" your backup in our Data Center infrastructure in the case of an attack, outage, or natural disaster
- ▼ Assistance in helping your organization achieve and maintain industry compliance requirements
- ▼ Guidance to elevate your financial firm from a CapEx to an OpEx IT finance model

Our team of highly-skilled Solutions Architects ensure to provide only the most reliable and robust Backup and Disaster Recovery plan for your financial firm, so contact us today!

ABOUT US

VPLS Solutions is a premier technology solutions provider and systems integrator, and the solutions provider arm of the VPLS Group of Companies. VPLS Solutions is not your typical technology reseller. We own and manage our own large, private, carrier-grade network and operate nine geographically diverse data centers. Our 20+ years of carrier heritage make us the perfect partner for your public, private or hybrid cloud needs, and your most complex network and data center challenges. We are also a full-service Managed Services Provider and offer Backup and Disaster Recovery services.

Please contact sales@vplssolutions.com today to learn more about our Backup and recovery services. We look forward to partnering with you.
