

BACKUP

BUSINESS CONTINUITY & DISASTER RECOVERY WHAT DOES THIS MEAN TO YOUR SCHOOL DISTRICT?

BC & DR

It is a common, but deadly mistake to use the term Backup (B/U) interchangeably with Disaster Recovery (DR). A mistake like this can cost your school uptime, data integrity, and data availability that can drastically affect your teachers' work, impacting your students' ability to learn. Backup is the process of making copies of files to have a historical record of your school's data, whereas Disaster Recovery is a set of procedures, hardware (computers, network, storage) and software (OS and applications) that enable your school to restore operations in the case of an attack, outage, or natural disaster. Both are equally crucial to have on school campuses as technology improves and as more and more devices are connecting to the network. Having both enables an effective Business Continuity plan: the assessment of your school's IT enterprise as well as systematically identifying and eliminating single-points of failure. However, developing an effective disaster recovery plan is not an easy task. Fortunately, a Managed Services Provider like VPLS will ensure to provide your school with the following:

- ▼ Backup as a Service (BaaS) allows VPLS to run your backups on our enterprise infrastructure
- ▼ VPLS's Disaster Recovery as a Service (DRaaS) adds the extra layer of actual hardware and software infrastructure to "stand up" your backup in our Data Center infrastructure in the case of an attack, outage, or natural disaster
- ▼ Assistance in helping your school district achieve and maintain FERPA and CIP compliance requirements
- ▼ Guidance to elevate your school district from a CapEx to an OpEx IT finance model

Our team of highly-skilled Solutions Architects ensure to provide only the most reliable and robust Backup and Disaster Recovery plan for your school district, so contact us today!

ABOUT US

VPLS Solutions is a premier technology solutions provider and systems integrator, and the solutions provider arm of the VPLS Group of Companies. VPLS Solutions is not your typical technology reseller. We own and manage our own large, private, carrier-grade network and operate nine geographically diverse data centers. Our 20+ years of carrier heritage make us the perfect partner for your public, private or hybrid cloud needs, and your most complex network and data center challenges. We are also a full-service Managed Services Provider and offer Backup and Disaster Recovery services.

Please contact sales@vplssolutions.com today to learn more about our Backup and recovery services. We look forward to partnering with you.
