

## Wireless Optimization Service

Sample Wireless Optimization Report

At the end of the survey, you will receive a detailed report that includes:

- Recommendations for access point locations and configurations including detailed coverage maps
- Coverage performance and simulation reports
- An in-depth analysis including easy to read and accurate color coded heat maps with options including signal strength, data rate, packet loss, roaming, overlap, spectrum utilization and more
- Identification of issues such as rogue access points, number of SSIDs or security policies, misconfigured access points, and problems with throughput, interference and/or coverage
